## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japanese reference 06-060100 or 11-339076.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blinn et al.'373 as set forth in the previous Office Action.

In reference to applicant's arguments is the following: Firstly, the applicant argues that the examiner erroneously equated various features of Blinn with that of the claimed system. One example of this that was pointed out was Blinn's "electronic merchandizing system" and the applicant's "commerce service provider". The examiner continues to believe that these are appropriate corresponding features. Both systems present items to an on-line shopper and give opportunities to purchase those items. The applicant further argues the payment method (visiting the store verses payment on-line) and apparently believes that by limiting such is patentably distinct. The examiner disagrees and believes that this is both well known (i.e., Circuit City offers such means) and very obvious.

Applicant's arguments filed December 3, 2003 have been fully considered but they are not persuasive.
